WHMCS being a transparent company, it provides a vast amount of information to the administrator pertaining to its status. This information includes licensing data, configurations and current client settings. As part of its licensing information, it provides to whom WHMCS is registered to. To view this information, please follow the step-by-step directions outlined below:

- Go to your WHMCS Admin Area
- Next, go to the "Help" tab in the top menu
- Finally, click on the "License Information" sub-option

As a consequence of the aforementioned actions, you might notice that the name on the WHMCS is the name of our company (LicenseCube). This is due to the way that WHMCS distributors are required to provide licenses, and is currently is an unchangeable option.

Should you have any further questions pertaining to your WHMCS license, please feel free to get in contact with the LicenseCube support team for additional help.
