# How do I forcefully re-install cPanel?

The cPanel re-installation process is quite similar to the cPanel installation process, but with one slight difference. Please follow the below step-by-step directions:

- Login to your existing cPanel server via SSH
- Next, run the following command from SSH:

# /scripts/upcp --force

- Please wait until the process completes

Should you have any further questions pertaining to your cPanel license, please feel free to get in contact with our web hosting support team for additional assistance.
