# How do I install a Plesk Language Pack?

Installing a Plesk language pack within your Plesk hosting environment isn't only quick, but is quite simple too. Please follow the step-by-step directions outlined below on how this process should be accomplished.

- Login to your Plesk Virtual/Dedicated server
- Next, locate the section entitled "Server Management"
- Under "Server Management" click on "Settings"
- Once under the "Settings" section, locate "Panel Appearance"
- Then finally click on "Languages" and make the necessary adjustments

Should you need to expand your [Plesk license](#) to support more language packs, please feel free to reach out to the LicenseCube support team for additional assistance.
