The overall process for installing DirectAdmin within your dedicated/virtual server isn't overly complicated. However, due to the nature of the DirectAdmin installer, you may need to perform additional changes post-installation. Please follow the step-by-step directions outlined below.

Please note during the installation of DirectAdmin, you will be requested to provide the Client ID, License ID and hostname. Please make sure you have those ready.

- Login to your VPS/Dedicated Server using SSH
- Next, run the following command within Linux:

wget http://www.directadmin.com/setup.sh && chmod 755 setup.sh && ./setup.sh

- Please follow the onscreen instructions

Should you have any further questions pertaining to your [DirectAdmin license](#), please feel free to reach out to the LicenseCube support team for additional assistance.
