The overall installation process for SolusVM is quite straightforward. The process is straightforward due to SolusVM having an auto-installer that will quickly guide you through the entire installation process, regardless of your virtualization type. Please follow the step-by-step directions outlined below:

- Login to your dedicated server via SSH
- Next, run the following command within Linux:

wget http://soluslabs.com/installers/solusvm/install &&
 chmod 755 install &&
 ./install

- Then, please follow the steps outlined within the installer

If you have any further questions pertaining to your SolusVM license, please feel free to get in contact with our web hosting support team for additional assistance.
