The process for limiting the maximum message size within Parallels Plesk is quite easy, and can be accomplished in a few easy-to-follow steps. Please see below for more detailed instructions on how to complete this:

- Login to your Plesk as the administrator
- Next, locate the "Server Management" section and on "Tools & Settings"
- Once under "Tools & Settings" locate the "Mail" section
- Under the "Mail" section, click on the "Mail Server Settings" link and locate:

Maximum message size

- Next, you will be able to update the size in "Kilobytes" in the input field
- Once ready, please input the new value and click "OK" to save changes!

Should you have any further questions pertaining to your [Plesk license](#), please feel free to get in contact with our web hosting support team for additional assistance.
