The process of loading your Plesk license into the Plesk panel isn't complicated. In fact, the license loading process should take less than a couple of minutes. Please follow the step-by-step directions outlined below:

- Login to your Plesk Admin Panel
- Next, go to "Tools & Settings"
- Then, locate the icon entitled "License Management"
- Once under "License Management" click on "Upload Key"
- Next, click on the "Browse" button and upload the new key
- Finally, check off the following two boxes:

Replace the currently installed license key with the selected one

Do not check the resource usage limits defined by the key

- When ready, simply click the "OK" button to apply your license!

Should you have any further questions pertaining to your [Plesk license](#), please feel free to get in contact with our web hosting support team for additional guidance/advice.
