How do I recover the Plesk admin password in Plesk 10 or above?

Recovering the Plesk panel password isn't complicated. However, there are a couple of different ways to get this accomplished. There are a couple of different ways due to the changes that have recently occurred within Plesk 10.x. Please see below for more information and step-by-step directions.

Parallels Plesk 9.x License:

- Login to your Plesk server via SSH
- Next, run the following command:

cat /etc/psa/.psa.shadow

- The output will include your Plesk password

Parallels Plesk 10.x License:

- Login to your Plesk server via SSH
- Next, run the following command:

/usr/local/psa/bin/admin --show-password

- The output will provide you with your Plesk password

Should you have any further questions pertaining to your [Plesk license](), please feel free to get in contact with the LicenseCube support team for additional assistance.
