How do I update my InterWorx license key?

While the process for updating your InterWorx license key isn't complicated, it does require a little previous command line experience. Please follow the below-mentioned step-by-step directions on how to update your InterWorx license.

- Login to your InterWorx server via SSH
- Next, navigate and edit the InterWorx config by doing:

cd /home/interworx/ && vi iworx.ini

- Once within the "iworx.ini€• file, locate and update the key variable:

Key=YOUR-NEW-KEY

- Save the configuration by pressing the following commands:

Esc key + :wq + enter key

- Upon completion, simply run the following command to sync the key:

~iworx/corn/license.pex --sync

Once the key has been synced up, your new license key has been successfully activated within your InterWorx server.

Should you have any further questions pertaining to your InterWorx license, please feel free to reach out to a member of the LicenseCube support team for additional assistance.
