Much like many other Parallels products, you will find that Virtuozzo works on a key file and/or product key. In order to view/load your Virtuozzo key, please follow the step-by-step directions outlined below for your convenience.

How to load a new key into Virtuozzo:

- Login to your hardware node via SSH
- Next, run the following Linux command:

vzlicload â€“p <Virtuozzo License>

- Once completed, you should see the following message:

Processing product key "<Virtuozzo License Key>"...
License VZSRV was loaded successfully
---
1 of 1 licenses was loaded

How to view the key within Virtuozzo:

- Login to your hardware node via SSH
- Next, run the following command:

vzlicview

- The output will provide you with license key details

Should you have any further questions pertaining to your Virtuozzo license, please feel free to get in contact with the LicenseCube support team for additional assistance.
