The process for disabling/enabling your RBLs (Realtime Black Lists) within your cPanel/WHM installation only takes a moment. Please follow the step-by-step directions outlined below for your convenience:

- Login to your WHM (Web Host Manager)
- Next, go under the "Service Configuration"
- Once located, please click on the "Exim Configuration Manager" link
- Next, while under "Basic Editor" tab click on the "RBLs" sub-tab
- Then, please ENABLE the following RBLs:

RBL: bl.spamcop.net
RBL: zen.spamhaus.org

- Once ready, simply click "Save" to apply the changes!

Should you have any further questions pertaining to your cPanel license, please feel free to get in contact the LicenseCube Support team for additional assistance.
