Having installed ColdFusion and obtained the Plesk Power Pack upgrade, you will now be able to start using the ColdFusion developer license within your VPS or dedicated server. Please follow the step-by-step directions outlined below:

- Login to your Plesk as the administrator
- Next, locate the "Server Management" section and on "Tools & Settings"
- Once under "Tools & Settings" locate the "Applications & Databases" section
- Then, click on the "ColdFusion Settings" link within and input the following:

/opt/coldfusionmx

- Once ready, simply click "OK" to save and apply the changes!

Should you have any further questions pertaining to ColdFusion hosting or your Plesk license, please feel free to get in contact with the LicenseCube support team for additional assistance.
