---

Having the ability to provide your services in multiple languages hasn't only become necessary, but vital in the ever-growing global business. For this reason, the Plesk SiteBuilder application now comes with support for 10+ languages. Please see below to learn what languages are supported:

Chinese (Simplified)	Chinese (Traditional)	Dutch
French	German	Italian
Japanese	Russian	Spanish
English		

Parallels is always adding additional languages, so should you not find your language supported, it is possible that it will be added later.

If you have any further questions pertaining to your [Plesk SiteBuilder license](#), please feel free to get in contact with the LicenseCube support team for further assistance.
