---

The process for removing subversion within your dedicated/virtual server is quite easy and will only take a few minutes to complete. Please follow the step-by-step directions.

- Login to your cPanel/WHM Virtual/Dedicated server
- Run the following command within Linux:

```
# pl /root/rvadmin/uninstall_rvsvn.pl
```

Upon completion, subversion will be uninstalled from your virtual/dedicated server.

Should you have any further questions pertaining to your [RVSkin license](#), please feel free to get in contact with the LicenseCube support team for further assistance as needed.
