---

By default, the configuration within Plesk SiteBuilder is set to "no", meaning that the SSL support isn't enabled. To enable SSL support within Plesk SiteBuilder, please follow the step-by-step directions indicated below.

- Login to your Virtual/Dedicated server via SSH
- Next, run the following command to enable SSL support:

```
# sb_config --enable_ssl
```

Should you have any further questions pertaining to your [Plesk SiteBuilder license](#), please feel free to get in contact with the LicenseCube support team for additional help.
