The process for getting RVSiteBuilder installed on your cPanel/WHM server is quite simple and generally only takes a few minutes to complete. Please follow the step-by-step directions outlined below.

Installing RVSiteBuilder via SSH:

- Login to your cPanel/WHM Virtual/Dedicated server via SSH
- Run the following command within Linux:

```
/scripts/makecphp && cd /usr/local/cpanel/whostmgr/docroot/cgi/ && rm -rf /usr/local/cpanel/whostmgr/docroot/cgi/rvsitebuilderinstaller/ && rm -f rvsitebuilderinstaller.tar && wget http://download.rvglobalsoft.com/rvsitebuilderinstaller.tar && tar -xvf rvsitebuilderinstaller.tar && chmod 755 addon_rvsitebuilder.cgi && rm -f rvsitebuilderinstaller.tar
```

- Upon completion, the installation will be finished.

Configuring RVSiteBuilder via SSH:

- Login to your cPanel/WHM Virtual/Dedicated server via WHM
- Next, locate the section entitled "Plugins" and click on the following:

"RVSiteBuilder Installer"

- Upon completion, please configure RVSiteBuilder as needed

Should you have any further questions pertaining to your [RVSiteBuilder license](#), please feel free to get in contact with the LicenseCube support team for further assistance.
