Typically, the process for resynchronizing your RVSiteBuilder license isn't necessary within cPanel. However, on the rare occasion that it is, you may do so by following the step-by-step directions indicated below.

- Login to your cPanel/WHM Virtual/Dedicated server via SSH
- Run the following command within your Linux environment:

```
# php /var/cpanel/rvglobalsoft/rvsitebuilder/updatelicense.php
```

- Please allow for a moment for the process to complete!

Should you have any further questions pertaining to your [RVSiteBuilder license](#), please feel free to get in contact with the LicenseCube support team for additional help.
