The process for removing RVSiteBuilder within your DirectAdmin server isn't only easy, but it literally only takes a few minutes to complete. Please follow the step-by-step directions outlined below.

- Login to your Virtual/Dedicated DirectAdmin server via SSH
- Next, run the following Linux command to backup RVSiteBuilder:

```
mkdir /usr/local/.rvglobalsoft &&  
cd /usr/local/.rvglobalsoft &&  
cp -a /usr/local/rvglobalsoft/rvsitebuilder/var ./ &&  
cp -a /usr/local/directadmin/plugins/rvsitebuilder/images/project ./
```

- Then, please continue with the uninstallation process by running:

```
rm -f /usr/local/rvglobalsoft/rvsitebuilderinstaller.tar &&  
rm -rf /usr/local/rvglobalsoft/rvsitebuilderinstaller &&  
rm -rf /usr/local/rvglobalsoft/rvsitebuilderinstaller/rvsitebuilder &&  
rm -rf /usr/local/rvglobalsoft &&  
rm -rf /usr/local/directadmin/plugins/rvsitebuilder &&  
rm -rf /usr/local/directadmin/plugins/rvsitebuilderinstaller
```

- That's it! Your RVSiteBuilder has now been uninstalled!

If you should have any further questions pertaining to your [RVSiteBuilder license](#), please feel free to get in contact with the LicenseCube support team for further help.
