---

The process for uninstalling Trendy SiteBuilder is quick and can be accomplished within a couple of minutes (provided you found this tutorial). Please follow the step-by-step directions outlined below for your convenience.

- Login to your cPanel/WHM server via SSH
- Next, run the following command within Linux:

```
http://trendyflashdownload.com/installer/cp/uninstall.sh &&  
chmod 755 uninstall.sh &&  
./uninstall.sh
```

Upon the completion of the uninstallation process, Trendy SiteBuilder will be completely removed from your server (as if it was never installed).

Should you have any further questions pertaining to your [Trendy SiteBuilder license](#), please feel free to get in contact with the LicenseCube support team for extra help.
