The process for installing WHMSonic on your cPanel/WHM server isn't only easy, but it can be completed within several minutes. Simply follow the step-by-step directions outlined below.

Installing WHMSonic via SSH:

- Login to your cPanel/WHM server via SSH
- Next, run the following command within Linux:

```
cd /root/ &&
 wget http://www.whmsonic.com/setupr/installr.sh &&
 chmod +x installr.sh &&
 ./installr.sh
```

Configuring WHMSonic via WHM:

- Login to your cPanel/WHM server via WHM
- Next, locate the "Plugins" section within the left side menu
- Once located, click on the "WHMSonic" link located within
- Make any/all configuration changes that are needed

Should you have any further questions pertaining to your WHMSonic license, please feel free to get in contact with the LicenseCube support team for further assistance.
