---

The process for uninstalling RVskins is quite easy and generally only takes a few moments to complete.

Please follow the step-by-step directions indicated below:

- Login to your Virtual/Dedicated server via SSH
- Next, run the following Linux command:

```
# perl /root/rvadmin/uninstall.pl
```

- Please allow for a few minutes for this process to complete

Upon the completion of the uninstallation process, you will no longer have to license the RVSkin software, so you may cancel it if you've not done so as yet.

Should you have any further questions pertaining to your [RVSkin license](#), please feel free to get in contact with the LicenseCube support team for additional assistance.
