The process for uninstalling WHMSonic is much the same as the process for installing WHMSonic. Please follow the step-by-step directions outlined below.

Uninstalling WHMSonic via SSH:

- Login to your cPanel/WHM server via SSH
- Next, run the following command via Linux:

```
cd /root/ &&  
wget http://www.whmsonic.com/setupr/uninstall.sh &&  
chmod +x uninstall.sh &&  
./uninstall.sh &&  
/usr/local/cpanel/bin/rebuild_sprites
```

- Upon completion, WHMSonic will be uninstalled.

Should you have any further questions pertaining to your [WHMSonic license](#), please feel free to get in contact with the LicenseCube support team for further assistance.
