The process for uninstalling WHMSonic is much the same as the process for installing WHMSonic. Please follow the step-by-step directions outlined below.

Uninstalling WHMSonic via SSH:

- Login to your cPanel/WHM server via SSH
- Next, run the following command via Linux:

cd /root/ && wget http://www.whmsonic.com/setupr/uninstall.sh && chmod +x uninstall.sh && ./uninstall.sh && /usr/local/cpanel/bin/rebuild_sprites

• Upon completion, WHMSonic will be uninstalled.

Should you have any further questions pertaining to your <u>WHMSonic license</u>, please feel free to get in contact with the LicenseCube support team for further assistance.
