The process for updating your RVSiteBuilder is quite easy, but does require a small amount of SSH knowledge, such as how to get connected to your virtual/dedicated DirectAdmin server. Please follow the step-by-step directions outlined below for your convenience:

- Login to your DirectAdmin Virtual/Dedicated server via SSH
- Next, run the following command within your Linux environment:

```
# perl /usr/local/rvglobalsoft/rvsitebuilderinstaller/autoinstaller.cgi
```

- Please allow a few moments for the process to complete.

Should you have any further questions pertaining to your [RVSiteBuilder license](#), please feel free to get in contact with the LicenseCube support team for additional assistance.
