How would I update my RVSiteBuilder in DirectAdmin?

The process for updating your RVSiteBuilder is quite easy, but does require a small amount of SSH knowledge, such as how to get connected to your virtual/dedicated DirectAdmin server. Please follow the step-by-step directions outlined below for your convenience:

- Login to your DirectAdmin Virtual/Dedicated server via SSH
- Next, run the following command within your Linux environment:

perl /usr/local/rvglobalsoft/rvsitebuilderinstaller/autoinstaller.cgi

- Please allow a few moments for the process to complete.

Should you have any further questions pertaining to your RVSiteBuilder license, please feel free to get in contact with the LicenseCube support team for additional assistance.
