While the process of removing Installatron within your DirectAdmin server is quite simple, we do still recommend that you follow the step-by-step directions to ensure that the uninstallation process is completed successfully. Please see below for additional details.

## How to remove Installatron from within your DirectAdmin server:

- Login to your DirectAdmin Virtual/Dedicated server via SSH
- Next, run the following command within Linux/Unix:

```
rm -fr /usr/local/directadmin/plugins/installatron &&  
rpm -e installatron-plugin-directadmin &&  
rm -fr /usr/local/installatron &&  
rm -fr /var/installatron &&  
rm -f /etc/cron.d/installatron &&  
rm -fr /home/*/.installatron
```

- Upon completion, your Installatron will be permanently removed!

If you have any further questions on how to remove your [Installatron license](#) from your DirectAdmin server, please feel free to get in contact with the LicenseCube support team for additional assistance.
