---

Obtaining a list of the installed scripts within Installatron isn't only a smart thing to do, but also vital to understand which scripts your customers prefer. By doing this, you can quickly and easily locate the script versions that are out of date. Please follow the step-by-step directions outlined below.

- Login to your Virtual/Dedicated server
- Next, navigate to the "Installatron" admin area
- Once within the Installatron admin area, on the left side menu
- Then, click on the "Installed Applications" subsection

Once you are within the "Installed Applications" subsection, you will be able to see all the installed scripts within your virtual/dedicated server.

If you have any further questions pertaining to your [Installatron license](#), please feel free to get in contact with the LicenseCube support team for additional help.
