---

The process for listing all the installations that have been done by Softaculous is quite easy, and gives you a general idea of the most utilized script. To do this, please follow the below-mentioned step-by-step guide.

- Login to your Virtual/Dedicated server as the admin (root)
- Next, navigate to the Softaculous Installation
- Then, click on "Installations" in the top menu
- Finally, sort the installations by using one of the three options:

By User - Displays scripts installed by a specific username

By Scripts - Displays the scripts installed within the account

By Outdated Installations - Which scripts have yet to be updated

If you have any further questions pertaining to your [Softaculous license](#), please feel free to get in contact with the LicenseCube support team for extra help.
