While the process for installing Installatron on a Plesk for Windows server is seemingly simple, there are some step-by-step directions that do need to be adhered to. Please see the directions outlined for your convenience.

Installing Installatron within your Plesk for Windows server:

- Login to your Virtual/Dedicated Plesk for Windows server via RDP
- Next, download/run the following file ("Run as administrator"):

http://data1.installatron.com/installatron/installatron_setup.exe

- Please follow the step-by-step directions outlined within the installer

Configuring Installatron within your Plesk for Windows server:

- Login to your Plesk Virtual/Dedicated server as the admin
- Next, locate the "Installatron Admin" button on the left-side menu
- Configure the "Installatron Admin" section as needed

If you have any further questions pertaining to your [Installatron license](#), please feel free to get in contact with the LicenseCube support team for extra help.
