The process for installing Installatron is quite easy, and only requires some basic knowledge of SSH (Secure Shell Access). The installation can be completed within a few minutes, so please, follow the step-by-step directions outlined below.

Installing Installatron within your DirectAdmin server:

- Login to your Virtual/Dedicated DirectAdmin server via SSH
- Next, run the following command via Linux:

```
wget http://data1.installatron.com/installatron/installatron_setup.sh &&  
chmod +x installatron_setup.sh && ./installatron_setup.sh &f
```

- Upon completion, please continue with the configuration step

Configuring Installatron within your DirectAdmin server:

- Login to your Virtual/Dedicated DirectAdmin server
- Then, locate the "Installatron Admin" button
- Configure on an as-needed basis

Should you have any further questions pertaining to your [Installatron license](#), please feel free to get in contact with the LicenseCube support team for additional assistance.
