While the installation process for Installatron is relatively simple, it does require some basic SSH (Secure Shell Access) knowledge. Please follow the step-by-step directions outlined below for your convenience.

Installing Installatron within your cPanel server:

- Login to your Virtual/Dedicated cPanel server via SSH
- Run the following command within Linux:

```
wget http://data1.installatron.com/installatron/installatron_setup.sh &&  
chmod +x installatron_setup.sh && ./installatron_setup.sh -f
```

- Upon completion, Installatron will be successfully installed

Configuring Installatron within your cPanel server:

- Login to your Virtual/Dedicated cPanel server via WHM
- Next, locate the "Installatron Admin" button within WHM
- Make any configuration changes as-if needed

Should you have any further questions pertaining to your [Installatron license](#), please feel free to get in contact with the LicenseCube support team for additional assistance.
