The process for enabling/disabling scripts within Softaculous is not only easy, but only will take a few moments. Disabling/enabling scripts within Softaculous will ensure that you can choose which scripts you'd like to display. Please follow the step-by-step directions outlined below.

- Login to your "Softaculous Admin" area
- Next, click on the "Software" tab in the top menu
- Then, check the scripts you don't wish to offer
- When ready, simply click "Update Settings" to apply!

Should you have any further questions pertaining to your [Softaculous license](#), please feel free to get in contact with the LicenseCube support team for additional assistance.
