In most cases, you'll never need to force Installatron to update, as it's always updated via the cron jobs or Windows Task Scheduler. Nonetheless, in those rare cases where a forced upgrade is required, please see the step-by-step directions outlined below for your convenience:

How-to update your Installatron via SSH:

- Login to your server via SSH (Secure Shell Access)
- Next, run the following Linux/Unix command:

```
wget http://data1.liquenox.com/installatron/installatron_setup.sh &&  
chmod 755 installatron_setup.sh && ./installatron_setup.sh -f
```

- Please allow for a few moments to complete.

How-to update your Installatron via RDP:

- Login to your Windows server as an Administrator via RDP
- Next, download/run the following .exe file ("Run as administrator"):

```
# http://data1.installatron.com/installatron/installatron_setup.exe
```

- Please follow the steps as they are outlined within the installation process

Should you have any further questions pertaining to your [Installatron license](#), please feel free to get in contact with the LicenseCube support team for additional assistance.
