---

The overall installation process for Softaculous within DirectAdmin is pretty straightforward. Nonetheless, please follow the below-mentioned step-by-step installation process to complete this install.

Please note this tutorial assumes that you already have IonCube installed within your DirectAdmin installation. If not, please ensure that you install IonCube first prior to continuing with this tutorial.

- Login to your DirectAdmin Virtual/Dedicated server via SSH
- Next, paste the following Linux command into SSH:

```
cd /usr/local/directadmin/plugins &&  
wget -N http://www.softaculous.com/da/install_softaculous.php &&  
chmod 755 install_softaculous.php &&  
/usr/local/bin/php -d open_basedir=/ -d safe_mode=0 -d disable_functions=""  
/usr/local/directadmin/plugins/install_softaculous.php
```

- The installer will follow start to indicate the installation process
- Upon completion, DirectAdmin will be fully installed

Should you have any further questions pertaining to your [Softaculous license](#), please feel free to get in contact with the LicenseCube support team for additional help.
