Getting Installatron installed within your InterWorx virtual/dedicated server isn't only easy, but literally only takes a few easy to follow steps to complete. Please follow the step-by-step directions to get Installatron Installed.

Installing Installatron within your InterWorx server:

- Login to your Virtual/Dedicated InterWorx server via SSH
- Then, run the following command within Linux:

```
wget http://data1.installatron.com/installatron/installatron_setup.sh &&  
chmod +x installatron_setup.sh &&  
./installatron_setup.sh -f
```

- Upon completion, please continue with the next steps outlined below

Configuring Installatron within your InterWorx server:

- Login to your Virtual/Dedicated NodeWorx server
- Then, locate and click on the "Installatron Admin" button
- Configure any/all (as-needed) settings that are needed

If you have any further questions pertaining to your [Installatron license](#), please feel free to get in contact with the LicenseCube support team for additional help.
