While the process of importing an externally installed application isn't complicated, we strongly suggest following the step-by-step installation guide outlined below.

- Login to your web hosting account as a client
- Next, locate and click on the "Installatron" icon to open
- Once Installatron loads, please click on the "Applications Browser" tab
- Next, locate the application you'd like to install, and click the following:

Import Existing Install

- Follow the import wizard process until completed

Should you have any further questions pertaining to your [Installatron license](#), please feel free to get in contact with the LicenseCube support team for additional assistance and/or guidance.why
