Switching from another billing system to WHMCS is both quick and easy. This is because WHMCS has creating a semi-automated import script. Using the import script, you can import over six (6) different billing systems. Please see a list of the billing systems you can import from outlined below:

ModernBill 4/5	ClientExec 3/4	WHMAutoPilot 3
AWBS 2.5 or later	Lpanel 1.7 or later	WhoisCart 2.2.x
AccountLab Plus 2.8	Kayako V3	

Should you have any further questions pertaining to your WHMCS license, please feel free to reach out the LicenseCube support team for additional help.
