Linking up your Plesk server with ClientExec isn’t complicated, it just takes a few simple to follow steps. The process for adding a server within ClientExec is quite simple, and can be accomplished within a few simple to follow steps Please follow the step-by-step directions outlined below:

- Login to your ClientExec Admin Panel
- Next, go to "System Setup" and then onto "Servers"
- Once under "Servers" click on "Add Server"
- Under the "General" tab fill the following fields:

Server Name
Hostname
Shared IP
Plugin (Plesk)
Domains Quota

- Next, click on the "Name Servers" and click "Add Nameserver"
- A new line will appear, please click on the value to update it
- Next, do the same for "IP Management" as the aforementioned process
- Finally, click on "Plugin Configuration" and input the new server data
- Once ready, simply click "Save" to save the new Plesk server

Should you have any further questions pertaining to your ClientExec license, please feel free to get in contact with our web hosting support team for additional assistance.
