The process for enabling your WHMCS on IPv6 isn't overly complicated, but due to the way WHMCS licensing works, it has to be completed manually. Please follow the step-by-step directions outlined below to make this possible:

- Please go to the [contact us](#) section of our website
- Fill in all the relevant information needed
- Next, please provide all the following information:

Customer Name:

Customer ID:

WHMCS License Key:

IPV6 Address:

- Finally, click the "Submit Form" button

Should you have any further questions pertaining to your [WHMCS license](#) running on IPv6, please feel free to get in contact with the LicenseCube support team for additional assistance/guidance.
