How do I configure a domain registrar within Ubersmith?

In order to be able to purchase/register/transfer a domain within Ubersmith, you must first configure Ubersmith to connect with the domain registrar. To do this, please follow the step-by-step directions outlined below:

- Login to your Ubersmith as the administrator
- Next, go to "Setup & Admin" and onto "Client Manager"
- Under "Client Manager" click on "Domain Registrars"
- Choose the domain registrar you'd like to work with from:

  - eNom
  - openSRS
  - NameCheap
  - Nominet

- Once ready, simply click "Configure" on the corresponding row
- Input all the necessary information located within the popup that appears
- Finally, simply click "Save" to apply all changes!

If you have any further questions pertaining to your [Ubersmith license](#), please feel free to get in contact with the LicenseCube support team for additional assistance.
