The PayPal payment gateway configuration within WHMCS is quite easy and can be accomplished in a few easy to follow steps. For your convenience, we've separated each step to make things simpler. Please follow the outlined steps below:

Configuration within WHMCS:

- Login to your WHMCS Admin Area
- Next, go to "Setup" and then onto "Payments" and onto "Payment Gateways"
- Then, locate PayPal in the drop down list, and click "Activate"
- Once activated, review all the settings and input needed information
- Finally, click on "Save Changes" once ready to apply your changes!

Setting up PayPal:

- Login to your PayPal Account
- Next, go to your "Profile" and then onto "Instant Payment Notifications"
- Once within this section, click on "Choose IPN Settings"
- Input the IPN URL such as:

<https://your-whmcs-address.com/whmcs-installation-folder/>

- Make sure you enable "Receive IPN Messages (Enabled)"
- Finally, simply click on "Save" to apply your settings!

Final WHMCS configurations:

- Login to your WHMCS Admin Area
- Next, go to "Setup" and then onto "Products & Services" and "Products & Services"
- Click on the main category that your products are under
- Once loaded, locate "Available Payment Gateways" and enable "PayPal"
- Finally, when ready, simply click "Save Changes" to apply!

Please note you may need to repeat the WHMCS process outlined a few times dependent on the amount of categories you have within your WHMCS.

Should you have any further questions pertaining to your [WHMCS license](#), please feel free to get in contact with our web hosting support team for additional assistance.
