Validating a ClientExec license to ensure its validity is important. Validating a license provides you with another way to check if the company you are purchasing from is reliable and honest. To do this, please follow the step-by-step directions outlined below for your convenience:

- Go to the ClientExec website
- Next, in the top menu click on "Verify License"
- Then, you'll see a Greybox appear, please enter in the hostname
- Finally, click on "Validate" and wait for the response

Please note that due to certain delays it may take up to four (4) hours for the systems to fully sync and a new license to be showed as "Active" rather than "Unlicensed".

Should you have any further questions pertaining to your ClientExec license, please feel free to get in contact with the LicenseCube support team for additional help.
