Online URL: <http://kbase.licensecube.com/billing-system/licenses/how-do-i-validate-my-whmcs-license.html>

Validating a WHMCS license isn't complicated, but is sometimes necessary to ensure the legitimacy of a web hosting provider. Please follow our step-by-step directions outlined below and you'll be able to tell within seconds if a WHMCS is licensed or not.

WHMCS License Validation:

- Go to the following WHMCS URL:

<http://www.whmcs.com/members/verifydomain.php>

- Next, input the URL that you wish to check
- Once ready, please press the "Submit" button

The result of the aforementioned process will be displayed to you in a matter of seconds. We strongly suggest double-checking the URL just in case it should return an "unlicensed" status.

WHMCS License Information:

Due to the way that WHMCS licensing functions, please note that if you have a new installation, it may take up to (4) hours for the initial license activation. This means, that if you try to validate your license prior to the time mentioned-above, that your license validation may fail.

Should you have any further questions pertaining to your [WHMCS license](#), please feel free to get in contact with the LicenseCube support team for additional assistance.
