Switching the domain name on your WHMCS license isn't complicated, but there are a few steps that you need to accomplish to correctly make the switch. Please follow the step-by-step directions outlined below.

Re-issuing your WHMCS License:

- Please go to the contact us section of our website
- Fill in all the relevant information needed
- Next, indicate that you need your WHMCS license re-issued
- Finally, click the "Submit Form" button

Adjusting configurations:

Once you have completed the license re-issue process (or its in process), you will be able to login to your WHMCS and switch the URLs by doing the following steps:

- Login to your WHMCS Admin Area
- Next, go to "Setup" and then onto "General Settings"
- Make the necessary changes, and save your settings!

After completion, please double check all the cron jobs, payment gateways, email forwarders, etc. Just to be sure that they are also changed to the correct domain.

If you have any further questions pertaining to your WHMCS license, please feel free to get in contact with our web hosting support team.
