Plesk Billing being one of the few billing solutions provided by Parallels, allows it to seamlessly integrate with other Parallels products, such as Plesk Panel. In this step-by-step tutorial, we will show you how to install Plesk Billing on an existing Plesk server.

- Login to your Plesk enabled VPS/Dedicated server via SSH
- Next, run the following Plesk command within Linux:

```
# /usr/local/psa/admin/bin/autoinstaller --select-release-current --install-component billing
```

- Upon completion, you should see a response such as the one below:

```
Patches were installed successfully.
```

```
The packages were installed successfully.
```

- You will now be able to login to "Plesk Billing" by going to this URL:

```
https://your-domain.com:8443/plesk-billing/admin
```

Please note upon login you may be prompted to agree to an additional license agreement, which covers information pertaining to Plesk billing. Please click "Yes" and continue.

Should you have any further questions pertaining to your [Plesk Billing license](#), please feel free to get in contact with the LicenseCube support team for additional assistance.
