The process for removing the branding from your ClientExec installation is quick and rather painless. To do this, please follow the step-by-step directions outlined below for your convenience.

Please note this tutorial assumes that you have purchased a Non Branding ClientExec license. If not, please don't follow the step-by-step directions outlined below.

- Login to your web hosting account via FTP
- Next, navigate to the "ClientExec" installation directory
- Then, go to the following folder URL:

/ClientExec-Installation/templates/default/

- Under the "default" template, edit a file called "index.tpl.php"
- Next, remove the "ClientExec" branding from within the aforementioned file
- Once ready, please save the settings to apply them!

Should you have any further questions pertaining to your [ClientExec license](), please feel free to get in contact with the LicenseCube support team for additional assistance.
