How would I reset my WHMCS administrator password?

The process for resetting your WHMCS password is quite simple. Nonetheless, you must have a few vital pieces of information and corresponding access rights. Please see the step-by-step directions outlined below:

- Login to your cPanel web hosting account
- Next, locate the section entitled "Database"
- From there, click on the "PHPMyAdmin" icon
- Next, locate the WHMCS database on the left-side menu
- Then, locate the table entitled "tbladmins" and click "Browse"
- After that, locate the "admin" row and click on the edit icon next to it
- Next, locate the "password" row, and input your new admin password
- Finally, select "MD5" as the as the encryption and click "GO" to apply!

Once you've completed all the above-mentioned steps, you will be able to login to your WHMCS admin area using your "admin" username and your newly added password.

If you have any further questions pertaining to your WHMCS license, please feel free to get in contact with our web hosting support team for additional assistance.
