Online URL:

While Ubersmith does the heavy lifting for you, in certain circumstances it's necessary to track the status of a particular transaction and its status. Being an advanced billing system, Ubersmith logs every action it performs, allowing administrators to easily track and manage actions that are being performed. Please see below for more details:

- Login to the Ubersmith instance via SSH
- Next, run the following command with Linux:

tail â€"f 200 /var/log/uberd.log

The above-mentioned command will provide you with the last two-hundred (200) messages it has logged from all of the payment gateway modules.

Should you have any further questions pertaining to your Ubersmith license, please feel free to get in contact with the LicenseCube support team for additional assistance.
